

**NeuroSky is currently recruiting two positions for its San Jose, California headquarters:**

### **Circuit Design Engineer**

Design PCB based bio sensors to implement new human-computer interaction product ideas. A qualified candidate must have a master of EE or equivalent, with 3-5 years of experience with analog or mixed signal PCB design, especially in sensor signal conditioning circuits, knowledge of embedded programming and bench top circuit testing.

### **Principle Analog ASIC Engineer**

Leads analog design team from concept to product including system architecture and specification design, circuit and transistor level design and verification, circuit layout, physical extraction and verification, silicon bench testing, and production test development. A qualified candidate must have a EE degree with 10 years of hands-on analog or mixed signal circuit design experience, with at least 5 years in a design leadership position.

**Qualified applicants may send their resume to: [careers@neurosky.com](mailto:careers@neurosky.com)**

**Company Description:** At NeuroSky, we believe it is our duty to preserve and protect our vital organs so we may continue to thrive as the human race. Hearts. Minds. Muscles. Eyes. Our organs are vital to our family, our patients, our students, our friends, our planet and our own existence. Early detection. Frequent exercise. Indulgent entertainment. Necessary healing. Together with our partners, we do this and more. That's why at NeuroSky, we make Bio Sensors for Every Body.

NeuroSky helps Fortune 500 companies such as Mattel and Toshiba and start-ups like InteraXon, innovate with EEG and BCI. You can find NeuroSky's brainwave technology in over one million devices worldwide. We supply the EEG ThinkGear coomponents for toys such as Mattel Mindflex and Star Wars Force Trainer and we design complete EEG headsets such as the MindWave used with LineKong MMO. We bring the human mind into toys, games, sports, education, health & wellness, research and automobiles.

NeuroSky is a privately held company with headquarters in San Jose, CA.
